About Coding Academy

In light of the increasing demand for qualified programmers in local and regional markets, Orange Jordan took on its shoulders the mission of qualifying a new generation mastering this skill efficiently.

The Coding Academy by Orange was launched in June 2019, in partnership with Simplon.co, to offer a free of charge 6-month training courses in coding languages for free, supported by 1-month internship in ICT sector. Every year 50 students, out of thousands of applicants, get the opportunity to join the Academy after passing a very competitive admission process. The employability rate among the first batch of students exceeded 70% which proves the efficiency of the academy's teaching methodology, curricula and academic staff.

What does the Academy Offers

- 6 months of cost-free training course.
- 1 month internship in one of the leading IT companies in the Kingdom.
- Intensive courses offered by a team of qualified trainers in an active-learning experience, such as: HTML, CSS, JavaScript (React,) PHP (Laravel), Python (Flask).
- Networking opportunities with the largest companies in the local and international markets.
- Access to careers and entrepreneurship training courses in life and administrative skills.

What are the academy goals?

1. Train and Empower Youth to enhance their opportunities in the digital sector in Jordan
2. Meet to the needs of local and global markets to meet the increasing demand for qualified programmers.
3. Lead the digital transformation in the local community by transforming the youth from technology consumers to producers.
4. Professional development to give youth a second chance to develop professionally.
